## **i** BASIC INFO

### LANGUAGES

Russian (Native language)

English (Intermediate B1)

### EDUCATION

History

Volgograd State University  
2001-2007

High school  
2001

### INTERESTS

Video games

Science fiction

Fantasy

Great movies

## **👤** EXPERIENCES

### Senior QA Engineer

August 2022 - Present time

Tinkov Development Center

I have founded integration automated testing within the development team. I am managing tasks for manual testing. I am writing functionality, if necessary, to facilitate system testing. I am conducting code reviews of developed features and representing the QA role in "three amigos" activities. I am interacting with external service providers and ensuring the fixing of bugs identified during integration testing with them.

### QA Automation Engineer

February 2022 - June 2022

Playrix

Continued to cover the area of responsibility for manual testing. Developed automated UI tests. Maintained and further developed a testing framework based on Python and RobotFramework.

### QA Engineer

November 2019 - February 2022

Playrix

I was involved in manual testing of internal web services of the company both on frontend and backend side. I conducted technical interviews when hiring new employees. Participated in planning the development of new services and new functionality for existing services. Acted as a mentor for new colleagues. Developed and maintained testing documentation. I started load testing of internal services in our team.

### QA Engineer

June 2018 - November 2019

Playrix

I was involved in manual testing of internal utilities. Conducted testing of the company's "engine". Developed and maintained up-to-date testing documentation.

QA Outsource

October 2017 - June 2018

Playrix

I was involved in manual testing of the company gaming projects. Verified bug fixes. Checked functionality against prepared test cases. Tested the correctness of localization.

System Administrator

September 2010 - November 2013

STK

Administered Linux/Windows servers. Administered network equipment. Provided technical support to users.
